## **Luxology Releases High-Quality Image Viewer for the Apple iPhone**

*New iPhone Application for Mobile Access to the Luxology Customer Gallery Now Available*

MOUNTAIN VIEW, Calif. – Nov. 23, 2009 – Luxology® LLC, an independent technology company developing next-generation 3D content creation software, announced today that it has released its first app for the millions of people using the Apple iPhone and iTouch. Apple customers who appreciate stunning, photo-real images can now download the [LuxGallery app](#), which allows them to quickly and easily view and search for computer-generated images found in the company's extensive Customer Gallery.

"The Luxology Customer Gallery is a showcase of images produced with Luxology's modo software that has grown to thousands of images in just a few short years," said Brad Peebler, president and co-founder of Luxology. "The Gallery is constantly updated and the new LuxGallery app is a convenient way for community members and others to remotely explore what other modo designers and artists are producing."

Available as a free download in the [iPhone App Store](#), the LuxGallery app was developed internally by Luxology and serves as a high-quality image viewer. The app provides the ability to search for images by keyword or to view images organized by categories such as Game Content, Jewelry Design and Print/Illustration. The app also lets users designate "favorite" images or to quickly view recent additions to the Gallery. Information about the modo artist who created the image and a brief image description can also be seen.
