Luxology Announces Free modo Training from Pixel Corps

Bi-weekly Podcast Training on Luxology's modo Premier Today on PixelCorps.tv and iTunes

MOUNTAIN VIEW, Calif. – Jan. 25, 2010 – Luxology® LLC, an independent technology company developing next-generation 3D content creation software, today announced a free bi-weekly podcast on the company's 3D modeling and rendering software [modo®](#). Created by Pixel Corps, a worldwide guild of content creators, each podcast will be hosted by Pixel Corps founder and Chief Architect, Alex Lindsay, with Pixel Corps digital effects artist McKay Hawkes as the show's first guest.

Beginning today, the first podcast will focus on realistic rendering and examining the integration of CAD files in modo. Future podcasts will explore additional features within modo and how the software fits into larger visual effects pipelines in a variety of industries. While Pixel Corps has always centered heavily on training and education, this will mark a new initiative to provide software training to the public for free. For more information or to download the complimentary podcast, please visit <http://www.pixelcorps.tv/modoshop>.

About Luxology

Based in Mountain View, Calif., Luxology® LLC is an independent technology company developing next-generation 3D content creation software that enhances productivity via artist-friendly tools powered by a modern underlying architecture called Nexus®. Founded in 2002 by Allen Hastings, Stuart Ferguson and Brad Peebler, Luxology is home to some of the top 3D engineering expertise in the industry. More information on the company, its licensable Nexus technology, its flagship product modo® and a gallery of artists' images from the active modo community is available online at www.luxology.com.

About Pixel Corps

Joining together professional digital artists and enthusiasts alike, Pixel Corps is a worldwide guild offering extensive training, access to the industry's most advanced applications, professional-quality field assignments and community participation unlike anything else available. Through the Pixel Corps, members have the opportunity to participate in a variety of projects ranging from podcast and feature film production to advancing their skills through specially designed challenges and seminars. Founded in 2002 by industry veteran, Alex Lindsay, Pixel Corps has grown to more than 1,500 members in over 36 countries. For more information, visit www.pixelcorps.com.
